

WP - 1200W - DV

55 GAL DRUM HEATING JACKET

- 1200W / 120V / vertical alignment
- Fits most standard 55 gallon (US) drums
- For use with metal drums

- 110°C / 230°F high temperature output
- Max content temperature reached in ~ 36-48 hrs
- 4 individually regulated heating zones

- Durable, PVC constructed outer shell
- Resistant to alkalis and solvents
- Multi-layered insulation materials

- Ideal for safely warming harder to heat products
- Conforms to ETL / UL / CSA standards

Application

Designed specifically to provide a safe and effective heating process for more difficult to warm products, the WarmPro high performance drum heating jacket generates the same even heat output but at a higher temperature. The result is an increase in product temperature without the risk of scorching or burning.

Technology

WarmPro heating jackets contain a set of custom designed, individually regulated, carbon graphite heating elements. These specially designed heaters feature high temperature tolerance, unequalled integrity and outstanding service life.

Ordering Info

Order #	Description	Size	Wattage	Configuration	Temperature
WP-1200-DV	High Performance Drum Heating Jacket	55 gal / 200 litres	1200W	Vertical	< 110°C / 230°F

Also Available

Order #	Description	Size	Wattage	Configuration	Temperature
